The Elks Open Their New Club Rooms

On Thursday evening, April 8, the Mirror Elk held the opening ceremonies for their new hall in the neighborhood of 200 of their friends and well-wishers gathered to help them celebrate. The program of the evening was a Whist Drive at which Mrs. G. Bryan and Mr. A. King were the lucky ones, being the recipients of handsome fountain pens. Miss Hazel Jamieson and Mr. A. Mitchell carried off the boobies. A dainty lunch was served and the Elks sure proved themselves good artists in this line. All report a good time and congratulations were extended the hosts on the comfortable quarters, which are the finest for a town of this size in the Dominion, and for which a great deal of credit is due W. C. McCormack.

Don't forget the whist drive in the Library Building Friday evening.

Mrs. F. Whiting left Tuesday for Big Valley and Calgary.

Miss W. Oldring entertained a few friends on Tuesday evening at "500".

Members and adherents of the Anglican church are asked to meet on the church grounds on Tuesday, April 20th for the purpose of cleaning the grounds.

Mrs. J. W. Spiece and grandchildren, Jean and Jack, spent the Easter holidays with the former's daughter, Mrs. S. Cooper, at Edmonton.

The Buffalo Lake Shippers' association shipped eight cars of stock last week. During the month of March shipments of cattle and hogs amounted to \$59,000.

The C. G. I. T. and the Trail Rangers will hold an open debate in the Union Church on Thursday, April 15th at 8 p.m. Subject "Resolved that Reading is More Beneficial Than Travel." The public are cordially invited to attend this debate.

The W. A. of St. Monica's church will hold a Sale of Work and Home Cookery and Tea in the Library Building on Saturday afternoon, April 17th. Everybody come and help make this event a success.

MacSteele and Bobby Cairns entertained about 25 boys and girls on Friday evening last at the home of Mr. and Mrs. James Parcell. The evening was spent in games and dancing. At 10:30 a very dainty lunch was served by the hostesses and was assisted by Mesdames Jas. Steele, R. Cairns, W. Marshall and Tulloch. The party broke up with three cheers for Mr. and Mrs. Parcell.

When Men Meet Men

First impressions are always lasting ones. That's why it means a great deal to you to Lishman Clothed when you meet important men.

Next time buy a Lishman suit or overcoat. Then you'll never be satisfied with anything but LISHMAN.

Tuxis Square Formed In Mirror on Monday

The Tuxis Square was organized on Monday evening with an attendance of nine. This group includes Jas. Oldring, J. Tulloch, B. Durrant, W. Cook, C. Marshall, J. Common, N. and H. Bay, H. Brackney, H. Moller, A. McDonald and L. Holditch. Officers elected were as follows: Mentor, Rev. R. G. Wood; Chief, J. Common; Sub-chief, H. Brackney; Tally, N. Ray; Cade, J. Oldring; door-keeper, C. Marshall.

It is the intention of the boys to put on some outdoor work before camp so that they may

be qualified if necessary to compete in the inter-provincial work and also to obtain their recognized standing in Alberta as an organized Tuxis Square.

Trail Rangers and Beavers

The Trail Rangers are busy these days and nights at their debate which takes this Thursday evening at 8 p.m. They are out to win and it looks as if they will put up some real arguments against the girls. Be on deck and see them do it.

The Beavers had a real old-fashioned paper chase on Saturday last and residents of the North-end saw a lot of boys traveling in a hurry and covering a lot of ground in a short time.

MORE SCOTTISH BRIDES FOR CANADA

The number of Scottish brides who have sailed from Glasgow to Canada this year, has been rather striking. Many of these young ladies are going to prospective husbands who have only been a short time in Canada. Here is a striking group, on board the Canadian Pacific liner "Marloch." Mr. Roden MacLeod, the Gaelic singer, is in the centre of the group. The brides, from left to right, are: Miss Andrew, (Motherwell); Miss Graham, (Edinburgh); Miss Duns and Miss Blair (Cothbridge).

WORLD HAPPENINGS
BRIEFLY TOLD

Countess Maria Rostova, only daughter of Bismarck, the Iron Chancellor, died at Kiel, Germany, aged 77.

The funeral of the late Countess Rostova, former wife of the late Countess Rostova, took place with Buddhist rites. The body was cremated.

Those who ride in taxicabs or horse cabs and refuse to pay their fares face jail sentences under the provisions of a bill adopted by the French Chamber of Deputies.

King Boris, of Bulgaria, in celebration of his thirty-first birthday, commuted the death penalty against ten persons accused of plotting against the state.

A delicious fruit, hitherto unknown to the civilized world, has been discovered in the Yucatan state, on the west coast of Mexico. The fruit somewhat resembles the ordinary olive in size and color.

By royal decree there are to be Sunday meetings throughout Spain at which officials must expound to adults of both sexes the principles of citizenship, public health and other matters.

Creation of a royal Indian navy as a combatant force and reconstruction of the Indian mercantile marine were announced by the retiring viceroy, Lord Reading, to the council of state at Delhi.

Princess Anastasia Volkonskaya, who, after the loss of her title in the Bolshevik revolution, turned to fortune telling for a living, has been sentenced to three years imprisonment for exploiting the prejudices and superstitions of the Red army soldiers. The 22 visiting Canadian soldiers were received by the Prince of Wales at York House, St. James' Palace. The Prince is president of the Royal Canadian Curling Club, Scotland, and the visitors represent the Canadian branch of the club.

The material value of a glimpse of the sun in London was \$150. A group of Londoners, tired of the gloomy weather, went to the Croydon Aerodrome. A meteorologist expressed the opinion that the cloud bank was not more than a mile deep. They rented an aeroplane and sunshine, in unmitigated brilliancy, was found at 4,600 feet.

Members of the Indian Legislative Council have formed a branch of the Empire Parliamentary Association, comprised of members of the British Parliament. A provisional committee has been appointed to draft rules and regulations. The British Parliament is to be asked to grant loans of about \$40,000,000 for the transportation to England of cotton from Africa.

Square Chin is Disappearing

Scientist Says Teeth Decreasing in Number and Chin Will Recede

A distinguished scientist informs us that among the changes continually going on in the structure of man are those affecting the teeth, which are decreasing in number. The third molar, he declares, is doomed, and other teeth may follow it until the normal state of man is toothlessness. When that happens the square chin will no longer be a sign of strength of character. For, as the teeth disappear or recede, the chin will recede also.

No Longer National Symbol

Apple Pie Loses Crown to Coconut Pie in Recent Contest

The great American apple pie is no longer a national symbol. If a recent pie contest held in Washington Valley, N.J., is a criterion. With a judge, lawyer, merchant, millionaire and policeman acting as judges, the housewives of the district presented every known pie for judgment, and when the awards were announced, not one prize had been given to the maker of an apple pie. First prize went to the creator of a creamy coconut pie.

New Cause For Ex-Kaiser Hate

A book about the ex-Kaiser by Emil Ludwig, just published in Germany, finds a new cause for the War Lord's hatred of Britain. As is generally known, the ex-Kaiser has been afflicted from birth with paralysis of the left arm. This, according to the book, he attributed to the fact that at his birth his mother was under the care of a British physician. For this deformity he never forgave either his mother or the physician whom she brought over from London to attend her—Glasgow Herald.

Jones—"A burglar got into my house about two am, when I was on my way from the club."
Smith—"Did he get anything?"
Jones—"He surely did. The poor beggar is in the hospital. My wife thought it was me."

Condoned Offense Of Turks

British Government Overlooked Infringement of Rules Regarding Mosaic Question

Although the Turkish Government attempted to influence public opinion in this country, with the aid of a section of the British press, in respect of the question of Mosul, the British Government, combined with the infringement of the rules of international conduct, and expressed its willingness to give every consideration to the requirements of the Turkish Government. That government cannot hope to receive a similar offer from any other nation, for no other nation can command the requisite resources, with the exception of the United States, which will do nothing for Turkey. Great Britain, however, in her dealings with Turkey, can rely upon the support of both France and Italy; and the worth of the friendship of the three most powerful nations in Europe is hardly to be despised.—London Morning Post.

Women Taking Up
Electrical Engineering

English Girl Has Been Apprenticed to Electric Supply Works

The development of electricity in England is providing many women with careers as revealed by the story of the Women's Engineering Society. George Street, Lancaster Square West. The society has a membership of 200, and was formed six years ago. Miss Hallett, the secretary said, "It endeavors to place trained women in the engineering profession. One of our members, Miss Margaret Farrington, is engaged in installing electric light in the village of Banbury, Devonshire, and the first girl ever apprenticed to an electric supply undertaking, Miss Kathleen Bunker, aged 19 years, a Londoner, took up her duties at Banbury on January 1.

Sir Eric Drummond, secretary of the League of Nations, intends to submit plans to the League for the erection at Geneva of a million dollar broadcasting station, which will be the most powerful in the world, according to Eric Palmer, American representative in Chicago of the recent broadcasting tests.

Colombia's celebration of the departure of the British occupying forces was brought to London by radio. Listeners heard the people of Colombia cheering wildly over the liberation from the British occupation, the bombing of the great new bell of the cathedral, the head banging and speech followed by rounds of "heeh" and the singing many times of "Deutschland Uber Alles."

Plan Route Through Canada

Many Tired of Trip From London to India Via Suez Canal

Canada is likely to become an integral part of a great highway from Britain to India. Plans are being made by the Canadian Pacific which will, when complete, make it possible to go from London to Calcutta by way of the Atlantic and the Gulf of Mexico and then by ship direct from the Pacific coast to India. The problem is to find a fare that will be economical enough, and one that will compete with existing routes, for although the voyage takes eight days longer than the present voyage to India by way of the Suez, which averages nineteen days, it is thought that many travelers who are tired of the old route and weary of its monotony would welcome an opportunity of seeing Canada and crossing the Pacific.

Paris Sanctions Straight Lines in Jumper Costumes

Made two-piece fashion: His jumper costume is smart for sports or business wear, with its convertible collar and, of course, long sleeves. The long tie—made of material to match the collar and cuffs—passing through a slot seam contributes a smart note. The skirt is joined to a body lining, and an inverted pleat at each side seam affords the fashionable flare. The blouse, No. 1038, is in sizes 34, 36, 38, 40 and 42 inches bust. Size 34 bust requires 2 1/2 yards of 36 or 40-inch material. The skirt, No. 1249, is in sizes 34, 36, 38, 40, 42 and 44 inches bust. Size 36 bust requires 1 1/2 yards 36 or 40-inch material, with 1/2 yard lining for bodice top. Price 25 cents each pattern.

Every woman's desire is to achieve that smart, dapper appearance which draws favorable comment from the observing public. The designs illustrated in our new Fashion Book are coordinated in the heart of the style center and will help you to acquire that much desired air of individuality. Price of the book 30 cents the copy.

ON THE AIR

What is Doing in the World of Radio

If he listens through one programme instead of jumping from station to station, he has had the set at least a year.

Request numbers on the radio would be all right if it were possible to get any action by requesting them to stop.

With all the popularity that radio has received in this country and in Britain, South Africa and Australia have not. In Germany has been attempted in these countries, but given up for lack of public interest.

It has been held that broadcasting station operators cannot possibly interfere with distress signals and for that reason they will not be required to keep silent in the future when a SOS call is heard. For this reason station operators will not be required to know code in the future.

Edvard Beila, noted French inventor, who is working on the installation of a telegraphic device, predicts that within several months radio sets will attach like screens to their receiving sets on which will appear the likenesses of the artists to whom they are listening.

American radio listeners will be afforded their first opportunity this month to go on vocal instruction by radio, when K.O.A., the Great Western Company station at Denver, launches a series of weekly lessons in voice culture.

A good way to clean a crystal which has lost its sensitiveness is to immerse it in ether. Place the crystal in a small bottle containing ether, shake the bottle vigorously, after which remove the crystal with a pair of tweezers. The crystal should return to its normal strength.

Sir Eric Drummond, secretary of the League of Nations, intends to submit plans to the League for the erection at Geneva of a million dollar broadcasting station, which will be the most powerful in the world, according to Eric Palmer, American representative in Chicago of the recent broadcasting tests.

Colombia's celebration of the departure of the British occupying forces was brought to London by radio. Cheese and Butter Exports

Notable Increase in Shown in Exports of Dairy Products

During 1913, Canada exported 159,712,000 pounds of cheese, valued at \$4,175,000, compared with 21,485,000 pounds in 1924, an increase of almost 50 per cent. Last year's export of cheese has not been equalled since back in the boom days, and is ahead of that shipped out in 1913. It is only \$100,000 pounds below the record established in 1904, but in \$10,000,000 ahead of that record in total value. It is not often that increased production is accompanied with higher prices, but that was the happy combination reported for the past season. The average price of the exportable surplus figures out at a trifle better than 22 cents per pound, which is 4 cents higher than that of last year. As usual, about 90 per cent. of the cheese exported from Canada went to the United Kingdom, though Newfoundland and Belgium took a fair quantity. Returns for 1925 show increases all along the line, shipments of butter, cream and fresh milk being well ahead of last year. Butter exports total \$4,446,000 pounds, valued at \$13,172,000, compared with 22,342,000 pounds, worth \$8,000,000 in 1924. Exports of fresh cream increased by almost 26 per cent. and were valued at \$7,660,000 while the value of fresh milk exported rose from \$223,906 in 1924 to \$781,900 in 1925.

In Swiss Navy Not A Joke

Won Battle Against French Poachers On Lake of Geneva

The Swiss navy is not, as many people think, a joke. It has fought and won a desperate battle against pirates on the Lake of Geneva. The action arose out of a frontier incident on the lake dividing the waters on the lake between France and Switzerland. A French fishing boat from Thonon-les-Bains was fishing at the lines it had laid down to capture the delicate lake trout, when it was pounced upon by a fast Swiss motorboat, a motorboat, whose role is to prevent poaching in the Swiss waters. The Swiss sailors claimed the French boat was in Swiss waters, and casting grappling lines aboard the French craft they proceeded to board it, revolver in hand. The Frenchmen were outnumbered and unarmed, but they seized guns and shot and resisted desperately until they were overpowered. The Swiss warship finally towed the prize into the port of Vevey, where the two members of the crew of the French vessel were lodged in jail.

Beggars Complain Of Competition

Business in Chicago Ruined By Mendicants From Other Cities

A young sociologist from the University of Chicago has discovered that the street beggars in that city "make" from five to twenty dollars a day. At the same time veteran mendicants say that they used to receive twice as much and complain that the competition of beggars who have come from other cities is "ruining" what they call their "profession." These figures show how warm-hearted and charitable the average American is. It is a pity that so much of his money should fall into the hands of those who are willing to live by "business" mendacity.—Youth's Companion.

Finished Long Task

Sir Dawson Dalziel Writes His Name 250,000 Times

Sir Dawson Dalziel, M.P., has just finished the task of signing his name in full more than 250,000 times in less than three months. This work has been imposed upon him through the conversion of the 250-franc shares of the International Sleeping Car Company (the Wagons-Lits) into 100-franc shares. No fewer than 1,125,000 new share certificates had to be signed by two directors each, and 250,000 fell to Sir Dawson's share. He is 71 years of age.

Make Turks Talk Turkish

A law before the Turkish National Assembly makes it a misdemeanor punishable by a fine of \$10, for a Turkish subject to speak any other than the Turkish language, except when absolutely necessary.

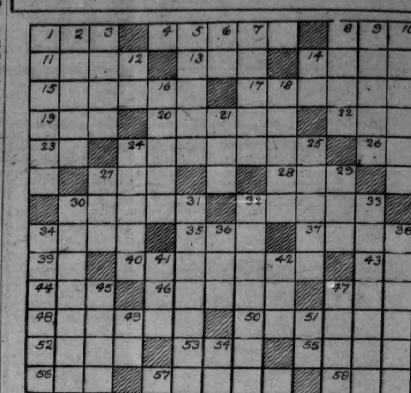

If the law is ratified, all new subjects, including the Hodge and Muzzelins, which in Crete call their faithful to prayer in Greek, will be compelled to learn Turkish.

Telephones in Canada

In 1911 there were only 334,000 telephones in Canada. By 1921 there were 509,000 phones, and at the end of 1924 there were 1,072,459 telephones in the Dominion. The increase in the number of telephone lines next to the growth of the automobile.

It's a mean bachelor who advises a girl to marry and then fails to propose.

Creameries Show Profit

Saskatchewan Co-operative Creameries Report Gain on 1925 Operations

Making a profit for the first time in five years, the Saskatchewan Co-operative Creameries closed 1925 with a balance on the right side of the ledger. Compared with a net loss of \$192, it was reported at the meeting at Regina.

Baldwin's Conquest

Of Great Britain

Has Swept All the Scholars and Lovers of Literature Into His Charned Circle

Mr. Baldwin's slow, steady, insatiable conquest of the hearts of the British people is one of the most notable things in recent political history. We may fancy that he has come to sleep, but that we can very properly follow his example, but when we wake up we find that a whole new province in our social "day-out" has been invaded, and that our persistent prime minister is already in full possession! Only a year ago Mr. Baldwin seemed essentially the plain statesman "pet" propriety, increased and increased revenue from cold storage plants was reported. Satisfactory results attended the experiment of feeding hogs at Invermay and Kelihier, while these making had been carried on successfully at the Regina plant.

The directors said they had given thought "to the legitimate expansion of our system, not necessarily in the immediate future, in order to develop a comprehensive plan which may bear close relationship to the development of trade routes which will inevitably occur during the next few years. With the early completion of the Hudson Bay Railway a new trade route will be created, which, like a magnet, will draw branch railways towards it. Both railway companies will extend lines to the police, and a smart young detective was set to work. A few weeks later his chief asked how he was getting on.

An Efficient Officer

The London consul of a continental kingdom was informed by his government that one of his countrywomen, supposed to be living in Great Britain, had been left a large fortune.

After advertising without result, he applied to the police, and a smart young detective was set to work. A few weeks later his chief asked how he was getting on.

"I've found the lady, sir."

"Good. Where is she?"

"At my place. I married her yesterday—Everybody."

A word to the wise may be said to get the speaker into trouble.

Lore is seldom confused until the evidence reflects on the stage where making a confusion is merely a matter of form.

Shows How To Control Or Extinguish Incipient Fires That Threaten The Farm Home

During the past few weeks there would seem to have been almost an epidemic of fire in the smaller homes, and, more regrettable still, these fires have resulted in an unusual number of deaths, particularly of children, as the natural resource intelligence service of the department of the Interior, Ottawa, has shown. These young lives are being lost so largely as the result of carelessness, or neglect in taking reasonable precautions. The use of coal oil or gasoline to light or heat from every winter takes its heavy toll of lives, while over-stuffed stoves and furnaces are accountable for a large share of the fire loss among Canadian homes.

Every precaution should be taken against fire. Careful examination should be made that no fire danger exists, that all stoves and chimneys are safe and whole, that lamps and lanterns are not left where small children may upset them, that matches, the cause of so many fires that result in the deaths of children, are kept beyond their reach, and that sparks cannot escape to the floor surrounding the stove. When the fire is out, however, it is of the utmost importance that a cool head be maintained; getting excited only delays adopting means to fight the fire, and in many cases the delay thus caused permits the fire to get beyond control. There is an old saying that "all fires are the same size at the start," but favorable conditions very quickly show their effect. A few simple precautions will be of much value in extinguishing a fire in its incipient stages, and the following should be no less impressed upon the mind that they will be almost automatically adopted when occasion arises.

The first thing to get is the ladder, so one can quickly carry water up to put upon the fire started in the shutters of the roof by sparks. It is also a good plan to have a bucket of water or a fire extinguisher always ready for use in the attic.

In farmhouse kitchens there should always be a bucket, best full of water,

resulting from grass or fat burning over on the stove should have water thrown on them, as that spreads the blaze. Use ashes, baking soda, salt or flour to smother it.

Water takes more heat away from burning material than any other fluid or substance. Things other than water used to put out a fire either smother it by keeping air from it or make a gas which pushes the air away. If the blaze is just starting, throw water on the material that is burning, not at the flames. One bucket of water will do more good if thrown on by the handful or with a broom than if dashed on at once.

Small fires may be smothered with a rug or blanket or beaten out with a wet broom. Salt or sulphur should be used to put out fires in the stove-pipe or chimney.

A gasoline fire can be put out by smothering it with wet rags, woolen cloth, sand, ashes, or flour. If water is used, put it on in large quantities; a small amount spreads the flames. Do not throw water on flames which start from kerosene oil, as it tends to spread the blaze. Smother the flames with a carpet, quilt or heavy clothing. Do not leave a door open when you run out to give an alarm. If the doors and windows are closed when the fire starts, one can probably get help in time to put it out while it is only in one room.

Mouth Organs Are Ancient

Probably the ancestor of the modern mouth organ is the ancient Greek musical instrument known as the *symphonion*, one of the oldest of all musical instruments. The modern mouth organ dates from 1839, when Christian Menzies, of Tromsø, Norway, first made a factory at Wernberg. This factory still gives employment to 8,000 persons, 5,000 working at the factory and 3,000 doing piece work at home.

Australian Butter For Canada

The Canadian Atlantic liner *Nisga* arrived at Vancouver, Feb. 5, with the first shipment ever consigned to Canada of Australian butter, a result of the Canadian-Australian trade treaty. The vessel brought 15,000 cases of the Australian product and 5,000 cases from New Zealand. Two thousand cases were unloaded in Victoria. The bulk of the Australian butter was destined for Toronto.

Every once in a while, after a few hours have forgotten there is such a thing, somebody drives by with a horse and buggy.

Food Value Of Honey

Tests By Experts Prove It Is Better Than Milk

People who have always looked on honey as a delightful delicacy rather than as a food may be surprised to learn that careful tests carried out by food experts have shown that in a pound of honey there is sufficient energy available to supply 42 per cent of the energy needed by a healthy active man in the course of twenty-four hours. A pound of milk, which is rated so highly as a food, can supply only nine per cent of a man's daily energy requirements, although, of course, it is rich in certain body-building elements. Honey, in addition to what it supplies in the way of energy, can give per pound, two per cent of a man's daily protein requirement, three per cent calcium, seven per cent phosphorus, and twenty-two per cent of the iron needed. All of these are essential to the maintenance of health and vigor. Reckoned in calories, honey has tened 1,520 calories to the pound, while beef steaks 956, milk 325 and white bread 1,225, the calorie being another way of expressing the energy value of a food.

Equally important, from the viewpoint of modern food science, is the fact that honey has been found to be rich in vitamin A, that mysterious food substance that the body must have if health is to be maintained.

Is Dairy Expert

Prof. Sadler, of British Columbia, Wins High Distinction

Prof. Wilfrid Sadler, of the University of British Columbia, who has devoted considerable time for the past few years to the study of a pure milk supply and the manufacture of certain varieties of cheese, has been recognized officially by the educational board of New York, who have awarded him a \$2,000 fellowship, expenses to and from a post in Europe and tuition fees while studying on the continent.

This is the first time a Canadian has won such an award, and it constitutes a distinct tribute to Prof. Sadler's ability and achievement.

Two varieties of cheese, one made at the Midland Agricultural College, England, under his personal direction, have been evolved by him and are now on the market. Prof. Sadler is now working on the relation of bacterial qualities of cheese. Arrangements have been completed whereby Prof. Sadler will work with Prof. Orla Jensen, of Copenhagen, Prof. Charles Harkell, of Stockholm, and Prof. Gorini, of Milan. Time will also be spent at the National Institute of Dairy Research, Reading, the ministry of agriculture and the ministry of health, London.

The international education board was incorporated in 1923 by John D. Rockefeller, Jr.

Community Settlements

Gen. Critchley Suggests Creation of Settlements
"Only 11,000 people migrated from Great Britain to Canada last year," remarks the London Sunday Observer in an interview with Brig-Gen. A. C. Critchley, a native of Calgary, who served in the Great War with the First Canadian Division. He has made his home in England since 1923 and is vice-president of the British Portland Cement Association.

In the interview General Critchley enlarged upon the merits of community settlement and urged that the Canadian Government, in close conjunction with the transportation organizations, should develop many areas over a long period of years. He suggested that as a start they might build a complete farming village in a selected district and have houses ready and farming instructions on the spot to receive enough families to fill the village. Each year, the government could take a certain proportion of the crops until the whole cost of founding the settlement was recovered.

"Save the Forest" Week

Canada's annual "Save the Forest Week" will fall this year between April 18 and April 24. Notice to this effect is given by his excellency, the governor-general in the current issue of the Canada Gazette.

Napoleon's Wooden Horse

Probably the most expensive toy ever bought was a broken-down wooden horse that has belonged to Napoleon Bonaparte, and which was sold in Paris some years ago for \$2,400.

More than 385,000 divorces were granted in the United States in 1923.

The Wealth Of Canada

Staggering When Compared to Population Says Sir Henry Thornton
Sir Henry Thornton, head of Canada's National Railways, and hailed as Canada's greatest publicity agent, declares that the wealth of Canada is staggering when compared to her population, and he furnishes the following figures of Canada's part in world production to support his contention:

Nickel—Eighty-nine per cent.
Asbestos—Eighty-eight per cent.
Cobalt—Eighty-five per cent.
Jellywood—Thirty-five per cent.
Lumber—Twenty-five per cent.
Cured Fish—Twenty per cent.
Silver—Ten per cent.
Oats—Twelve per cent.
Wheat—Eleven per cent.
Gold—Seven per cent.—Simpson Reformer.

World's Largest Warehouse

Building in Liverpool Required Over Twenty-seven Million Bricks

Can you imagine a building so large that all the people of Liverpool—over three million—could stand in it with room to spare? Such a building exists in Liverpool; it is called the Stanley Dock Tobacco Warehouse, and on its thirteen floors as big an area as a dozen ordinary football fields, 770,000 bales of tobacco can be stacked.

This is the largest warehouse in the world, for it is 725 ft. long, 165 ft. broad, and about 125 ft. high from the street level. Over 27 million bricks and 6,000 tons of iron were used in its construction.

The Wheat Board Surplus

Bankethan is Putting the Money to Excellent Use

Excellent proposals for the use of the \$284,200 which fell to this province as its share of the wheat board surplus have been presented to the legislature by its committee on agriculture. The committee is in accord with Premier Danahy's proposal that the money should be invested and the interest put to work for agriculture forever. Its plan is to constitute a research foundation, with the dean of the agricultural college, the minister of agriculture and the great deal of the university board of governors as members. It is suggested that they be empowered to spend the interest of \$25,000 on research into farm problems, particularly such urgent problems as wheat rust and marketing, and on scholarships for brilliant students of agriculture.—Saskatoon Star.

Voting in Australia Compulsory

Other Countries Might Very Well Follow This Example

Australia has set a worthy example in making voting compulsory. One of the aims of the state is to influence on the part of the voters. Australia, like Canada, has suffered from the evil effects of that criminal indifference, and has taken strong measures to force its population to recognize their responsibility toward the state. As a result, 92 per cent of the males on the register and 91 per cent of the females voted at the recent election. It is high time Canada followed the example of the Southern Commonwealth.—The Sentinel, Toronto.

Claim Made That Canada Has Lower Per Capita Taxation Than U. S. or Great Britain

Seeking Help Of Scientists

New Zealand Wants To Be Great Britain of South

New Zealand, which applies to be the Great Britain of the southern hemisphere, is setting to work to develop her manufactures on scientific lines, and has applied to those distinguished scientists, Sir Ernest Rutherford and Sir Frank Taylor, for assistance and advice. With her Alpine Mountains and torrents, New Zealand will probably be able to develop hydro-electric power on a great scale. Then she will need skilled labor, and be able to attract the British artisan and town laborer. The dominions will not get themselves filled up rapidly if they rely on rural immigration alone.

Lack of Humidity

Conversely, where a house at 70 degrees above, seems too cold, it's the lack of humidity that causes the sensation, asserts a medical writer. He declares that the average house in winter is dryer than Death Valley, the Sahara, or even old King Tut's tomb by actual humidity measurement. Put humidity in your home at all costs, if you would be healthy in winter, he advises.

Don't get too swift; you can walk farther in a day than you can run.

From authoritative figures issued by the Canadian Tax Conference

under the direction of Dr. Horace L. Ritchie, it appears that Canada has a lower per capita total of federal, provincial and municipal taxes than the United States, Australia or Great Britain. The percentage of total taxes to net production is smaller here than in Great Britain or Australia, but larger than in the United States. According to these figures, which are for 1923, Canada's total per capita tax is \$63.11, that of the States \$67.39, of Australia \$68.68, and of Great Britain \$75.12. The percentage of total taxes to net production in Canada is 16.7, in Australia 21.4, in Britain 28.9, and in the United States 25.3.

The total amount of taxes raised in Canada during the year in question was \$600,487,727, while Australia raised \$460,517,947, Britain \$4,266,213,252, and the United States \$7,387,935,516. It is an interesting fact that while 45.3 per cent of Australia's Commonwealth taxation was derived from customs duties and 35.5 per cent of the Dominion's, the United States derived only 17.5 per cent from this source, and Great Britain under so-called free trade realized 16.7 per cent.

It is evident from the figures quoted that, although Canada had the lowest per capita tax of the four countries, she paid 5.8 per cent more of her annual net production to governments in taxes than does the United States, thus leaving that much less of her income for the individual to spend as he desires. On the other hand, the Canadian has an advantage in this connection of 1.9 per cent, over the Australian and 8.2 per cent over the Britisher. While the per capita total of local taxation that is, provincial or state and municipal, is nearly the same for Canada and Australia, the former derives the greater portion through municipal channels and the latter through state channels.

Intensive Wheat and Stock Raising

Vacant Spaces in Manitoba to Be Filled Up With Settlers

Many tracts of Manitoba lands which have been only partly farmed will be filled up with settlers this spring who will engage in intensive wheat and stock raising, according to information secured from P. W. Russell, of the Canada colonization board. Deals are on now, Mr. Russell stated, concerning the vacant parcels of land, most of it privately owned, where the owner is willing to dispose of part or all of his acreage.

There are involved in the negotiations a number of large farms, some of them from 2,000 to 5,000 acres, which have only been farmed in a small way. Such a farm would support 10 families, with intensive farming methods, Mr. Russell stated, and a farm of 600 acres would easily support three families. By filling in the vacant or partly vacant spaces in the provinces, Mr. Russell declared, conditions in Manitoba as a whole would be bettered in every way and that a great increase in wheat production, stock raising and dairying would result. The settlers will be placed on the land in the spring, he stated.—Manitoba Free Press.

Send Fish Eggs To Japan

Eastern Canada Brook Trout Eggs to Stock Streams of Flowing Kingdom

The first shipment of Canadian fish eggs to be sent to the Orient went out on the Canadian Pacific Express of Asia which sailed from Vancouver recently.

This supply of 50,000 Eastern Canadian brook trout will be used to stock the streams and lakes of the Tokio Angling and Country Club, the most extensive sports club in Japan, if within the late Premier Borden was president.

The request for fish eggs was made to the Dominion Government by Sir Charles Elliot, British ambassador at Tokyo. The precious cargo is packed in a specially constructed insulated box and has been entrusted to the personal care of the ship's chief until it reaches Yokohama.

London's Zero Hour

London's most tranquil moment in the week is at 3 o'clock on a Sunday morning. Any other morning hundreds of thousands of people are dashing about, market carts are hurrying through the streets and the city is otherwise very busy.

The conviction that doctors are quacks doesn't signify anything except that you are in good health.

A DAY WITH THE HEBRIDEANS

The MacLeans Farm where 100 Acres of Grass was Harvested in 1925

Mr. Neil MacLeod

The Hebrideans are rapidly carving out new homes in Western Canada.

In one of their settlements, at Elvarts, near Red Deer, Alberta, the fact is impressed that far from their native land, they have settled down to the new conditions with a determination to succeed. It is probably in the women, the home-makers, that the large interest lies. Their very evident pride in their culinary accomplishments assures well for the best interests of their families in this new land.

"I got a book and learned how to make cakes," said Mrs. Lena MacLeod, one of the Hebridean matrons. "A woman, one of my neighbors, taught me how to make bread and I baked twice a week. I never saw bread before till I came to Canada, but we all like it better than haddock now."

Mr. and Mrs. Neil MacLeod, with eight children, live on their new farm of 100 acres, near Elvarts. They have been settled there for two years and built an addition to a one-roomed house that was on the place. This year they threshed 100 acres of grain. Mr. MacLeod's mother, known to the family as "Granny," with two of his sisters, live in "Red Deer." One of the girls who had some years of experience in a hospital in the Old Country, is employed here as a housekeeper, at seventy dollars a month. Six of the eight MacLeod children attend school in the district of their farm and Mrs. MacLeod states that they are all very fond of their studies and "get lots of stars at school."

"At home they were quiet like the master and would cry when I made them go to school; here they bawled if they have to stay at home."

Mrs. MacLeod's husband was a sailor and fisherman in the Hebrides. "He was always away," she said, "and it is good to have him at home on the farm. We feel so much more settled. About eight years ago we bought a small craft of 35 tons, on the island and kept two cows. I did the work while my husband was at sea. I worked with a spade from dawn till dark, so very hard, yet we

could not make any money and could not grow enough to feed ourselves. We finally came to Canada penniless. Now I wish we had come here when we bought that craft and we would be comfortable today. Father Macdonald told us of the chances in Canada. We just left everything and came with his party. Now I always pray for Father Macdonald for bringing us out here. It is the only thing I can do for him to pray that God will take care of him for doing so much for us."

"Have my garden," she continued, "I buy very little from the store. I canned peas, beans, carrots, beets, and she exhibited her winter stores with great pride. "I canned peaches and plums too."

There was a flock of promising turkeys in the yard. When asked if she would have a turkey for Christmas, her face lighted up. "Oh, yes," she said, "We'll have a turkey and we had one last year and I sent one to 'Granny' in Red Deer. That is more than I was ever able to do at home."

"Oh, yes we are raising all the time. I have brought my two brothers out since we came. They are so delighted that we are able to send for them. They are working at threshing now, putting all their money in the bank and will buy farms next spring."

Mr. and Mrs. Roderick Galbraith from the Hebrides, have a pleasant little cottage with dairy maids, cattle and the windows. They have finished threshing a very good crop and have quite a lot of stock and some fine berries."

A race situation for a house and a more pleasing outlook could not be found than that of Mr. and Mrs. Roderick Galbraith' farm-home presents. Located near Elvarts, on a rise of ground, a miniature hill, it slopes to a small forest and has a front view of five stretches of grain. The small hill is tree-covered. It has thick poplars and several straight dignified planes. In summer, when the poplars are in leaf, the house is in the heart of a little sun-kissed forest that is

gay and musical with the song of the birds. "It is just a chorus most of the time," said Mrs. Gills, "and the trees make it so cool. If I just had a view of the sea occasionally, instead of the prairie, this place would be just right." Mr. and Mrs. Gills are from the island of Barra and have three young children.

Naturally, the Hebrideans on the prairie are very homesick for the sea. There are few who have not said of it, "It is like tang, know his temper. However, in Canada they find great compensation in their work, even if they do long for their seagirt island."

The Hebrideans about Elvarts are settled on what is known as the "new farms," that is farms surrounded by neighbors of other nationalities. In place of in community settlements. Thus they are assisted and advised by experienced farmers and given words of cheer when the way of this new land seems strange and inhospitable.

A short distance from Red Deer, in the vicinity of the former industrial school, are the group of twelve cottages, erected by the Scottish Knutson Settlement. They are for the purpose of giving temporary accommodation to the Hebrideans while they are endeavoring to become located on farms. At present these houses are occupied, generally, by widows and their families. Work is secured for the children who are old enough to go out to service. The younger children attend school in one of the industrial buildings. A Gaelic teacher has been secured for them, that is one that can talk Gaelic but is a graduated Canadian teacher and follows the Canadian system in her work.

Western Canada has prospect of a new industry being developed in the immigration of these people. Many of the women have a knowledge of knitting, cordage and housework. When they are later assembled in groups, looms will be put up and the industry encouraged. This year some wool of Harris housework (wool) was made by these Hebridean women and sold to the Hudson's Bay Company.

How to Build Up
Your Community

The best way to build up a town is to stand by every man in the town who does right. Whenever a man is doing well, do not seek to trip him. All the residents should be partners in the community's interests, not opponents. The more business your rival does the more you will do. Every business man who treats his customers honestly, courteously and fairly will get his share, and the more business that can be secured by united effort the better it will be for all. Stand together for the advancement of every citizen. If a man shows ability to prosper do not pull him back through jealousy, or weight him down through a cold indifference.

A Bill is before the Canadian House of Commons authorizing the government to advance to settlers who are Canadian citizens within the meaning of the Immigration act, loans up to \$1,000 and

to other settlers not coming within that definition, loans up to \$200. The total sum which the government will be authorized to pay out in any particular year is limited to \$5,000,000. Loans are only to be advanced to settlers on crown lands. Parliament has adopted a resolution supporting the proposed measure.

That 182 miles of new railway lines was completed and opened for operation in Alberta during the year 1925 is one of the interesting statements in the annual report of the provincial department of railways, tabled in the legislature last week. The report states this is the largest annual increase since the year 1915 in new transportation lines. Of the additional mileage 111 miles was constructed by the Canadian National Railways. There are now more than 5,000 miles of railway lines within the province, the report states, whereas the railway mileage in Alberta at the time of its creation as a province in 1905 was only 1060.

Nine thousand five hundred egg and poultry producers in Saskatchewan have organized to market their products by the pooling system. The majority of these have signed an agreement to sell entirely through the pool.

Government Liquor Control
of Alberta
Application for Beer
License

Public notice is hereby given that the undersigned intends applying to the Alberta Liquor Control Board for a License to sell Beer by the glass or open bottle, for consumption in conformity with the provisions of the Government Liquor Control Act of Alberta, and regulations made thereunder, with respect to the following premises:

The Imperial Hotel, situated on Lots 1, 2 and 3, Block 9, Plan 7129 A. I. Townsite of Mirror, Alberta, the beer room being on the north-east corner of the building. Dated at Mirror, Alberta, this 29th day of March, 1926.

MARIE DEMUYNCK,
 Applicant.

Around the Town

The Elks are now happily settled in their new home.

Dont forget the auction sale at Hopkins Livery Barn at 2.30 on Saturday.
